Competition Brief 2021

INTRODUCTION

The Architects' Regional Council Asia (ARCASIA) is a Council of the presidents of the National Institutes of Architects of 21 Asian countries that are members of ARCASIA. This year, ARCASIA is going to organize an Online Design Competition among the individual students from ARCASIA member countries. This ARCASIA Students' Architectural Design Competition 2021 is organized by the ARCASIA Committee on Architectural Education (ACAE) Secretariat.

OBJECTIVE

The objective of the ARCASIA Students' Architectural Design Competition is to provide an arena for students from ARCASIA Member Institutes to participate in ARCASIA activities. It is an opportunity for students from different cultures to exchange and share idea on particular design issue that is raised by ARCASIA every year.

COMPETITION THEME

“PUBLIC SPACES IN 15-MINUTE LIFE CIRCLE”

Technology has significantly changed our everyday lifestyle. The well-developed transportation shortens the temporal and spatial distances, and the upgraded information and communications technology also makes it more convenient to rapidly get our daily necessities and service at home. The neighbourhood and community in the spatial sense have then been redefined. Under the labour-division cooperation, people assemble and construct the city in higher efficiency. The tendency where people are increasingly segmented and atomized in urban life, however, is unprecedentedly weakening the interpersonal interaction and connection.

Besides the hackneyed nostalgia, how can we understand the surrounding environment and neighbourhood? What is the relationship between human scale and a walkable urban space? When the reason for communication and interaction in a neighbourhood is gradually attenuated by the capital and commercial hegemony, is it still valuable for us to leave home and walk down to a nearby place to do something and to meet someone?

A “15-minute life circle” is home-centred and covering the whole area that can be reached in 15 minutes by walking at a normal pace. The boundary of one 15-minute life circle usually forms an irregular shape due to the urban morphology and terrain being passed. Meanwhile, the circle size is varied because of the diversity of personal pace and energy. Regardless of individual differences, the 15-minute life circle has body characteristics, daily performance, and social features for everyone.

With no use of any vehicle, people can experience both the natural and artificial environment alongside when moving around just on foot. A 15-minute life circle provides an open and perceivable urban space where people can enjoy all the public spaces, services and resources. The definition of neighbourhood is substantially embodied when people can affirm that they are living in a social network by encountering acquaintances and sharing the place with others.

This competition allows students to provide the solution to the problems from both physical and social perspectives on their 15-minute life circle and its public space. The program and design of the project are open to any level and scale. The project could be a renovation of an urban fragment, a regeneration of a garden, an installation to reconnect the neighbourhoods, a kid-friendly urban renewal, and so on. Students are encouraged to observe their cities, clarify the problems, arrange the program, and give a responsive solution in this competition.

ENTRY ELIGIBILITY

Any current full-time student studying in an Undergraduate Architecture program accredited/recognized by respective National Institutes of Architects of ARCASIA Member Institutes.

INDIVIDUAL / TEAM SUBMISSION

Individual or team submissions are accepted. No limitation on number of team members. However, Students are only allowed for one submission either on an individual or team basis.

Competition Brief 2021
